

NeoNxGen™ Thermal Management Solutions

TECHNICAL DATA SHEET 600

Product Overview

eGRAF® NeoNxGen™ thermal management solutions family of products have been designed to provide a high performance, thick flexible graphite material for the most demanding thermal management challenges in the consumer electronics, medical, automotive, and energy storage applications. This new type of high-performance graphite enables single layer solutions where multiple layers of graphite were previously required. NeoNxGen graphite can be die-cut, or laminated with plastics and/or adhesives etc. to create easy to install solutions.
